## GDCh-Advisory Committee on Existing Chemicals of Environmental Relevance (BUA)

### **Chairman:**

Prof. Dr. E. Bayer, Institut für Organische Chemie der Universität Tübingen

### **Members:**

Dr. G. Alfke, Mineralölwirtschaftsverband e. V., Hamburg  
Prof. Dr. K. Ballschmiter, Abteilung Analytische Chemie und Umweltchemie der Universität Ulm  
Dr. R. Bias, BASF AG, Emissionsüberwachung und Ökologie, Ludwigshafen a. Rh.  
Dr. B. Broecker †, HOECHST AG, Abteilung Umweltchemikalien/Verbrauchersicherheit, Frankfurt am Main  
Prof. Dr. O. Fränzle, Geographisches Institut der Universität Kiel  
Prof. Dr. F. H. Frimmel, DVGW-Forschungsstelle am Engler-Bunte-Institut der Universität Karlsruhe  
Prof. Dr. H.-P. Gelbke, BASF AG, Toxikologie, Ludwigshafen a. Rh.  
Prof. Dr. H. Greim, GSF — Institut für Toxikologie, Neuherberg (Vice Chairman)  
Dir. und Prof. Dr. J. Hahn, Institut für Wasser-, Boden- und Lufthygiene des Umweltbundesamtes, Berlin  
Dr. H. Jungen, Deutsche Wissenschaftliche Gesellschaft für Erdöl, Erdgas und Kohle e. V., Hamburg  
Dir. und Prof. Dr. D. Kayser, Bundesinstitut für gesundheitlichen Verbraucherschutz und Veterinärmedizin, Berlin  
Dr. W. Mühlhölzl, Bayerische Landesanstalt für Wasserforschung, München  
Prof. Dr. P. Müller, Institut für Biogeographie, Universität des Saarlandes, Saarbrücken  
Dir. und Prof. Dr. E. Offhaus, Umweltbundesamt, Berlin  
Dr. R. Ott, Deutsche Shell Chemie GmbH, Eschborn/Ts.  
MinRat Prof. Dr. U. Schlottmann, Bundesministerium für Umwelt, Naturschutz und Reaktorsicherheit, Bonn  
Dr. N. Schön, BAYER AG, Umweltschutz/Produktsicherheit, Leverkusen  
Vizepräsident Dr. A. Troge, Umweltbundesamt, Berlin

### **Collaborators and Guests:**

Dr. K. H. Adlfinger, Initiative Umweltrelevante Altstoffe, Frankfurt am Main  
Priv.-Doz. Dr. J. Ahlers, Fachgebiet IV 1.2 des Umweltbundesamtes, Berlin  
Dr. S. Ettel, Institut für Organische Chemie der Universität Tübingen  
Dr. J. Feltes, Fraunhofer-Institut für Toxikologie und Aerosolforschung, Hannover  
Dr. R. F. Hertel, Fachgruppe 821 des Bundesinstituts für gesundheitlichen Verbraucherschutz und Veterinärmedizin, Berlin  
Dr. H.-J. Klimisch, BASF AG, Toxikologie, Ludwigshafen a. Rh.  
Dr. G. Könnecker, Fraunhofer-Institut für Toxikologie und Aerosolforschung, Hannover  
Dr. J. Koppenhöfer, Institut für Organische Chemie der Universität Tübingen  
Prof. Dr. R. Kümmel, Institut für Umwelt- und Sicherheitstechnik der Fraunhofer Management-Gesellschaft, Oberhausen  
Frau Dr. I. Mangelsdorf, GSF - Institut für Toxikologie, Neuherberg  
Frau Dr. I. Neumann, GSF - Institut für Toxikologie, Neuherberg  
Dr. J. Oberhansberg, BG Chemie, Heidelberg  
Frau Dr. U. Reuter, GSF - Institut für Toxikologie, Neuherberg  
Dr. G. Rosner, Fraunhofer-Institut für Toxikologie und Aerosolforschung, Hannover  
Dr. P. Stahnecker, BASF AG, Ludwigshafen a. Rh.  
Frau Dr. H. Sterzl-Eckert, GSF - Institut für Toxikologie, Neuherberg  
Dr. D. Vogel, Institut für Organische Chemie der Universität Tübingen  
Frau Dipl.-Biol. L. Weis, Institut für Organische Chemie der Universität Tübingen  
Frau Dr. K. Widmann, Institut für Organische Chemie der Universität Tübingen

## Foreword

The German Chemicals Act (Chemikaliengesetz - ChemG) of 1980 stipulates that certain existing chemicals must be reported to the competent authority, if they exhibit properties which indicate that they may be hazardous, either alone or in combination with other substances.

In the summer of 1982, an Advisory Committee on Existing Chemicals of Environmental Relevance (BUA) was set up by the German Chemical Society (Gesellschaft Deutscher Chemiker - GDCh). It brings together representatives from the scientific community, the chemical industry and the governmental authorities. This Advisory Committee is responsible for elaborating appropriate solutions for substances of relevance for health and the environment on the basis of voluntary measures. It selects and examines existing chemicals from the aforementioned angles. The testing and evaluation are based on scientific criteria alone.

It was, therefore, necessary to develop priority setting procedures. In a first phase reports were only prepared for priority chemicals. Within the framework of a first priority setting procedure, chemicals were compiled from several priority lists and 135 chemicals were selected for detailed substance reports.

In a second priority setting procedure the survey of the German Chemical Industry Association (VCI) on all substances with a production volume of more than 10 tons per year was used as a starting list. Since this survey covered 4,600 chemicals, BUA decided to process the corresponding list in several stages. The first stage included approx. 1,050 substances with a production volume of more than 1,000 tons per year.

Detailed reports are drawn up on chemicals suspected of having a hazard potential and abridged reports on those presenting only a minor hazard potential, according to the current state of knowledge.

The detailed BUA reports take in both the published literature and data from industry. If data for the evaluation of the chemicals are not available, additional studies are recommended and the results are published as updates to the reports. The reports serve as a basis for the instigation of administrative measures, when there are indications of risks to health or the environment.

Tübingen, May 1993

Ernst Bayer  
Chairman of the Advisory Committee  
on Existing Chemicals  
of Environmental Relevance

## Contents

<b>Summary and conclusions</b> .....	<b>XI</b>	
<b>Recommendations</b> .....	<b>XVI</b>	
<b>1</b>	<b>Chemistry of triisopropanolamine</b> .....	<b>1</b>
1.1	Chemical identity .....	1
1.2	Composition of the industrial product .....	2
1.3	Chemical properties .....	4
<b>2</b>	<b>Physical properties</b> .....	<b>6</b>
<b>3</b>	<b>Analytical methods</b> .....	<b>9</b>
3.1	Determination in air .....	9
3.2	Determination in water .....	10
3.3	Determination in soil, sediment and biological material .....	10
3.4	Determination in consumer products .....	10
<b>4</b>	<b>Discharge into the environment during manufacture, processing, use and waste disposal</b> .....	<b>11</b>
4.1	Manufacture .....	11
4.2	Manufacturers and processors production levels exports, imports, total consumption .....	12
4.3	Processing, use, consumption .....	14
4.3.1	Processing .....	14
4.3.2	Use .....	16
4.4	Discharge into the atmosphere .....	18
4.4.1	Discharge during manufacture and processing .....	18
4.4.2	Discharge during application .....	18
4.5	Discharge into the hydrosphere .....	19
4.5.1	Discharge during manufacture and processing .....	19
4.5.2	Discharge during use .....	19
4.6	Discharge into the geosphere and biosphere .....	20
4.7	Discharge via waste and waste disposal .....	20
4.8	Summary of discharge into the environment .....	20

5	Occurrence in the environment .....	22
5.1	Atmosphere.....	22
5.2	Hydrosphere .....	22
5.3	Geosphere .....	22
