Abstract

VII

Model-Based Exposure Assessment in Terrestrial and Near-Shore Marine Environments

| | | |
|----------|--|-----------|
| 1 | Models for Soil Moisture and Groundwater Dynamics | 1 |
| 1.1 | Physical Basis for Modelling | 1 |
| 1.2 | One-Dimensional Models | 3 |
| 1.3 | Slope and Areas Models | 4 |
| 1.4 | Groundwater Models | 6 |
| 1.5 | List of References | 10 |
| 2 | Modelling the Behavior of Chemicals in Soil and Groundwater | 12 |
| 2.1 | Modelling the Transport of Dissolved Chemicals | 12 |
| 2.2 | Model Verification | 28 |
| 2.3 | Calibration and Validation | 33 |
| 2.4 | Overview | 33 |
| 2.5 | List of References | 35 |
| 3 | Flow Modelling in the Marine Area | 40 |
| 3.1 | Model Development | 40 |
| 3.2 | Application of Physical Flow Models of Various Scales | 41 |
| 3.3 | Modelling Substance Transport | 47 |
| 3.4 | Ecological Models | 49 |
| 3.5 | Chemical-Sediment Interaction | 52 |
| 3.6 | Summary and Overview | 58 |
| 3.7 | List of References | 60 |
