Summary	IX
Data Gaps	XII

4-Chloro-2-nitroaniline (CAS-No. 89-63-4)

1	Substance Characterization	1
1.1	Chemical Identity	1
1.2	Composition of the Technical-Grade Product	2
1.3	Chemical and Physical Properties	2
2	Analysis	4
3	Emission into the Environment during Production, Processing, Use and Waste Disposal	8
3.1	Production Methods	8
3.2	Producers and Processors, Production Quantities, Export, Import, Total Consumption	8
3.3	Emission Behavior	9
3.3.1	Emission into the Atmosphere	9
3.3.2	Emission into the Hydrosphere	9
3.3.3	Emission into the Geosphere	11
3.3.4	Emission through Wastes and their Treatment	11
3.4	Overview of Emissions into the Environment	12
4	Occurrence in the Environment	13
5	Environmental Behavior	16
5.1	Biodegradation	16
5.2	Abiotic Degradation	16
5.3	Accumulation	17
5.4	Distribution in the Environment	18
5.5	Environmental Fate	18

6	Ecotoxicity	19
6.1	Aquatic Organisms	19
6.2	Terrestrial Organisms	24
7	Toxicity to Warm-Blooded Organisms	25
7.1	General Effects	25
7.2	Toxicokinetics and Metabolism	25
7.3	Acute Toxicity.....	26
7.4	Subacute, Subchronic and Chronic Toxicity.....	26
7.5	Sensitization.....	28
7.6	Skin and Mucous Membrane Tolerance	29
7.7	Genotoxicity	29
7.8	Carcinogenicity	31
7.9	Reproduction Toxicity	31
7.10	Effects on the Immune System	32
7.11	Other Effects.....	32
7.12	Experiences with Humans.....	33
8	Substance-Specific Legal Regulations	34
9	References	35
