on Existing Chemicals (BUA)

2,4-Difluoronitrobenzene

BUA Report 252

(July 2004)

S. Hirzel

Wissenschaftliche Verlagsgesellschaft 2006

GDCh-Advisory Committee on Existing Chemicals (BUA, Status 07/2004)

Chairman:

Prof. Dr. H. GREIM, Technische Universität München, Weihenstephan

Members:

Frau Dr. M. BETH-HÜBNER, Berufgenossenschaft der Chemischen Industrie, Heidelberg
Prof. Dr. N. CASPERS, Bayer AG, BIS-SUA-PUA I, Leverkusen
Prof. Dr. H. DREXLER, Institut für Arbeits- Sozial- und Umweltmedizin, Universität Erlangen
Frau Prof. Dr. H. FOTH, Institut für Umwelttoxikologie, Universität Halle an der Saale
Prof. Dr. Dr. H.-P. GELBKE, BASF AG, Toxikologie, Ludwigshafen am Rhein
Dr. W. KÖRDEL, Fraunhofer-Gesellschaft, IME, Schmallenberg
Prof. Dr. R. NAGEL, Institut für Hydrobiologie, Technischen Universität Dresden
Prof. Dr. Dr. H. PARLAR, Institut für Lebensmitteltechnologie und Analytische Chemie,
Technische Universität München
Dr. M. SCHÜMMANN, Arbeitsgruppe Epidemiologie der IMBE/Univ. Klinikum Hamburg-Eppendorf und Behörde für Wissenschaft und Gesundheit (BWG)
Dr. B. STOCK, Bayer AG, BIS-SUA-PUA I, Leverkusen
Prof. Dr. R. ZELLNER, Institut für Physikalische und Theoretische Chemie, Universität
Duisburg-Essen (Vice Chairman)

Guests:

Frau Dr. A. BAMBAUER, Anmeldestelle Chemikaliengesetz, Dortmund
Frau Prof. Dr. U. GUNDELT-REMY, Fachgebiet 8, Bundesinstitut für Risikobewertung, Berlin
MinR Dr. H. A. KLEIN, Bundesministerium für Wirtschaft und Arbeit, Bonn
Dr. M. LULEI, Verband der Chemischen Industrie, Frankfurt am Main
Dr. N. RUPPRICH, Bundesanstalt für Arbeitsschutz und Arbeitsmedizin, Dortmund
Dr. K. STEINHÄUSER, Umweltbundesamt, Berlin

With the collaboration of:

Dr. U. ENSENBACH, Clariant GmbH, Ökotoxikologie, Sulzbach
Dr. S. ETTTEL, Universität Duisburg-Essen
Frau Dipl.-Biol. U. FRANK, Umweltbundesamt, Berlin
Frau Dr. H. GREIM, Technische Universität München, Weihenstephan
Dr. U. JENSCH, Clariant GmbH, Toxikologie und Regulierungen, Sulzbach
Dr. G.-R. JÄNIG, Fachgebiet 8, Bundesinstitut für Risikobewertung, Berlin
Frau Dr. B. LAUBE, Hannover
Frau Dr. I. NEUMANN, Technische Universität München, Weihenstephan
Dr. A. WEYERS, Institut für Hydrobiologie, Technischen Universität Dresden
Frau Dr. K. WIDMANN, Technische Universität München, Weihenstephan

Responsible at BMU:

MinR Prof. Dr.A. BASLER, Bundesministerium für Umwelt, Naturschutz und
Reaktorsicherheit, Bonn

GDCh Office:

Dr. H. BEHRET, GDCh, Frankfurt am Main

Preface

The Advisory Committee on Existing Chemicals, BUA for short, was established in May 1982 to help the German federal government cope with the large task of dealing with existing chemicals. In an agreement between federal government, scientific community, and the chemical industry, it was associated with the German Chemical Society (GDCh, Gesellschaft Deutscher Chemiker) to ensure objective work carried out in accordance with scientific principles. Since the beginning of 2001 the BUA has been composed of scientists from the research areas of chemistry, analytics, monitoring, toxicology, primary and secondary exposition, aquatic and terrestrial toxicology as well as the fate and behaviour of compounds in water, soil, air. The BUA is supported by experts from federal government agencies and the German Chemical Industry Association (Verband der Chemischen Industrie [VCI]).

No other national or international body has dealt with the ecological and health-related effects of as many existing chemicals as the BUA. Upon the recommendation of the federal government, the BUA has participated as a Peer-Review Group in the evaluation of ICCA-compounds (ICCA: International Council of Chemical Associations) since 2000 and also acts as the Contact Point in the OECD-HPV-Chemicals Programme (High Production Volume). The goal of the initiative is on the one hand to complete the data on the HPV chemicals and on the other to undertake an internationally coordinated evaluation of their hazard potential.

The BUA began an additional national project in 1997, which also selects and assesses existing chemicals with a lower production volume in the range of 100 - 1000 tonnes/year. The chemical industry presents about 50 datasets for such substances each year, for which the BUA sets the priority. Comprehensive reports are published on chemicals suspected of having a hazard potential. If the data available for substance assessment are insufficient, the gaps in knowledge are documented and, if necessary, investigations recommended. On the national level, the BUA has produced comprehensive reports on about 330 substances and carried out preliminary evaluation and classification (priority-setting) for approximately 200 more. The processes leading to priority-setting and the BUA reports are published to lend transparency to the Committee's work.

Moreover, BUA, as a group of expert advisors, is increasingly addressing scientific questions and problems, which apply simultaneously to many compounds, among others: "Marine Risk Assessment: Concept and Criteria" (BUA Report 220), "Biological Impact of Synthetic and Natural Endocrine Active Substances – Effects on Human Health" (BUA Report 228), Risk Assessment of Substances in Soils" (BUA Report 230), Persistent Organic Pollutants (POPs) (BUA Report 232) and "Safety Factors in Toxicological Risk Assessment". For each of these themes an analysis is made of the scientific state of the art, is documented and the results published in reports such as the current volume. The aim of BUA is to develop assessment concepts, determine data gaps, point out the need for further research and, last but not least, also to reduce information deficits in the general population.

Weihenstephan
