GDCh-Advisory Committee on Existing Chemicals of Environmental Relevance (BUA)

Chairman:

Prof. Dr. E. Bayer, Institut für Organische Chemie der Universität Tübingen

Members:

Prof. Dr. K. Ballschmiter, Abteilung Analytische Chemie und Umweltchemie der Universität Ulm
Dr. B. Broecker, HOECHST AG, Abteilung Umweltchemikalien/Verbrauchersicherheit, Frankfurt am Main
Prof. Dr. O. Fränze, Geographisches Institut der Universität Kiel
Prof. Dr. F. H. Frimmel, DVGW-Forschungsstelle am Engler-Bunte-Institut der Universität Karlsruhe
Prof. Dr. H.-P. Gelbke, BASF AG, Toxikologie, Ludwigshafen a. Rh.
Prof. Dr. H. Greim, GSF - Institut für Toxikologie, Neuherberg (Vice Chairman)
Dr. W. G. Haltrich, BASF AG, Emissionsüberwachung und Ökologie, Ludwigshafen a. Rh.
Prof. Dr. D. Kayser, Bundesgesundheitsamt, Berlin
Prof. Dr. W. Mücke, Institut für Toxikologie und Umwelthygiene der TU München
Prof. Dr. P. Müller, Institut für Biogeographie, Universität des Saarlandes, Saarbrücken
Prof. Dr. E. Offhaus, Umweltbundesamt, Berlin
Dr. R. Ott, Deutsche Shell Chemie GmbH, Eschborn/Ts.
Prof. Dr. U. Schlottmann, Bundesministerium für Umwelt, Naturschutz und Reaktorsicherheit, Bonn
Dr. N. Schön, BAYER AG, LE Umweltschutz/AWALU, Leverkusen
Dr. A. Troge, Umweltbundesamt, Berlin

Guests:

Dr. H. W. Kraus, Bundesministerium für Umwelt, Naturschutz und Reaktorsicherheit, Bonn
Prof. Dr. R. Kümmel, Technische Hochschule Leuna-Merseburg
Dr. J. Oberhansberg, BG Chemie, Heidelberg
Dr. H. K. Schäfer, Initiative umweltrelevante Altstoffe, Frankfurt am Main

In collaboration with:

Priv.-Doz. Dr. J. Ahlers, Umweltbundesamt, Berlin
Dr. S. Austin, Hüls AG, Marl
Prof. Dr. Dr. H. Bolt, Institut für Arbeitsphysiologie an der Universität Dortmund
Dr. B. v. Bülow, Hüls AG, Marl
Dr. S. Ettl, Institut für Organische Chemie der Universität Tübingen
Frau Dr. C. Gallikowski, Umweltbundesamt, Berlin
Dr. W. Koch, Umweltbundesamt, Berlin
Frau Dr. I. Mangelsdorf, GSF - Institut für Toxikologie, Neuherberg
Dr. H. Rademacher, Hüls AG, Marl
Dr. N. Scholz, Hüls AG, Marl
Frau Dr. H. Sterzl-Eckert, GSF - Institut für Toxikologie, Neuherberg
Dr. D. Vogel, Institut für Organische Chemie der Universität Tübingen
Frau Dipl.-Biol. L. Weis, Institut für Organische Chemie der Universität Tübingen
Dr. M. Weiß, Hüls AG, Marl
Frau Dr. K. Widmann, Institut für Organische Chemie der Universität Tübingen

Foreword

The German Chemicals Act (Chemikaliengesetz - ChemG) of 1980 stipulates that certain existing chemicals must be reported to the competent authority, if they exhibit properties which indicate that they may be hazardous, either alone or in combination with other substances.

In the summer of 1982, an Advisory Committee on Existing Chemicals of Environmental Relevance (BUA) was set up by the German Chemical Society (Gesellschaft Deutscher Chemiker - GDCh). It brings together representatives from the scientific community, the chemical industry and the governmental authorities. This Advisory Committee is responsible for elaborating appropriate solutions for substances of relevance for health and the environment on the basis of voluntary measures. It selects and examines existing chemicals from the aforementioned angles. The testing and evaluation are based on scientific criteria alone.

It was, therefore, necessary to develop priority setting procedures. In a first phase reports were only prepared for priority chemicals. Within the framework of a first priority setting procedure, chemicals were compiled from several priority lists and 135 chemicals were selected for detailed substance reports.

In a second priority setting procedure the survey of the German Chemical Industry Association (VCI) on all substances with a production volume of more than 10 tons per year was used as a starting list. Since this survey covered 4,600 chemicals, BUA decided to process the corresponding list in several stages. The first stage included approx. 1,050 substances with a production volume of more than 1,000 tons per year.

Detailed reports are drawn up on chemicals suspected of having a hazard potential and abridged reports on those presenting only a minor hazard potential, according to the current state of knowledge.

The detailed BUA reports take in both the published literature and data from industry. If data for the evaluation of the chemicals are not available, additional studies are recommended and the results are published as updates to the reports. The reports serve as a basis for the instigation of administrative measures, when there are indications of risks to health or the environment.

Tübingen, May 1993

Ernst Bayer
Chairman of the Advisory Committee
on Existing Chemicals
of Environmental Relevance
