Drug Information and Recommendations

Drug Portraits with Evaluations
for Physicians and Pharmacists

Edited by Prof. Dr. Hermann P.T. Ammon,
Prof. Dr. Dr. Drs. h.c. Ernst Mutschler
and Prof. Dr. Dr. h.c. Hasso Scholz.
Editorial assistance: Dr. Monika Neubeck.

Complete work incl. 13th supplement 2015.
2466 pages. 3 ring binders. Loose-leaf serial.
€ 98,- [D]
ISBN 978-3-8047-3334-3

Advising and prescribing – be informed, quick, and objective

Selecting the right medication and providing patients with qualified advice is only possible with solid professional knowledge! Three respected pharmacologists and their teams provide tested knowledge in a nutshell:

- basic information on selection and dosage
- information on suitability for use during pregnancy and nursing
- dispensing instructions and tips on what recommendations to make
- **extra:** objective evaluations of therapeutic value.

The well-known standard reference work on drug therapy continues to grow and provides you with the right tools for the job!

Readership: Commercial pharmacists, physicians, pharmacy interns, pharmacists new to the job and returning to work

Gröber

Pocket Guide to Interactions – Medication and Micronutrients

By Uwe Gröber.

2nd revised and enlarged edition 2015.
Approx. XVIII, 280 pages. 14 colour figures. 6 tables.
Format 11,5 x 16,5 cm. Flexible.
Approx. € 29,- [D]
ISBN 978-3-8047-3212-4

Watch out for micronutrient thieves!

Whether antibiotics, oral antidiabetic agents, statin-type cholesterol-lowering drugs, diuretics, oral contraceptives, osteoporosis medicines, proton pump inhibitors or cytostatics, many medications can affect the balance of essential vitamins and other micronutrients. The problem? Drugs and micronutrients use the same transport and metabolism paths in the human body. Medication-induced micronutrient deficiency can even be the unrecognized cause of drug side effects.

Find out here what you need to know about medicines and micronutrients and how to improve the effectiveness of medication and your patients' quality of life.

Readership: Physicians, pharmacists, health-care professionals, nutrition specialists

Gröber / Kisters

Fitness for Mind, Heart and Circulation

More quality of life with amino acids

By Uwe Gröber and Prof. Dr. Klaus Kisters.

2015. Approx. 100 pages. 18 colour figures.

39 colour illustrations. 7 colour tables.

Softcover. Approx. € 15,- [D]

ISBN 978-3-8047-3318-3

Amino acids – the building blocks of life!

Compared to vitamins and minerals, science long neglected the amino acids, even though they are just as important, for they are the actual building blocks of health and vitality for our bodies.

An inadequate supply of amino acids and other nutrients can contribute to complaints such as listlessness, exhaustion, poor concentration, irritability, stress or diseases of the cardiovascular, immune or nervous systems. This guide describes the various complaints and symptoms with their associated risk factors, and it explains which amino acids or micronutrients are important for their prevention and therapy.

Readership: Pharmacists, pharmaceutical technicians, physicians, nurses, alternative practitioners, patients

Otto / Nieber

Helwig / Otto Drugs

A Handbook for Physicians and Pharmacists

Revised by Prof. Dr. Hans-Hartwig Otto and Prof. Dr. Karen Nieber.

In collaboration with Mechthilde Otto.

11th edition incl. 6th supplement 2015. 2036 pages.

2 ring binders. With index booklet (73 pages).

Loose-leaf serial.

€ 298,- [D]

ISBN 978-3-8047-3360-2

Optimising drug therapy

This loose-leaf collection covers the entire spectrum of the pharmaceutical market, compares newly approved drugs with standard therapy, and provides information about dosage, indications, risks and interactions.

The 6th update of the 11th edition includes all analgesics, immunomodulators, nose, mouth and throat therapeutics as well as sedatives and hypnotics put on the market prior to early December 2014.

New: Drugs included for the first time are evaluated in comparison to other substances with the same indication, highlighting their risk-benefit ratio.

Readership: Physicians, pharmacists, pharmaceutical industry, institutes, libraries

Verlagsgesellschaft Stuttgart

Meyer

Herbal Tea Recipes

A Handbook for Pharmacists and Physicians

By Dr. Egbert Meyer.

Complete work incl. 5th supplement 2015. 1058 pages.

1 ring binder. Loose-leaf serial.

€ 64,- [D]

ISBN 978-3-7692-6014-4

Herbal teas – the health boost in a cup!

Often, pharmacy customers and doctors' patients request herbal medicinal teas as an alternative to drugs. In addition to the classic herbal teas, there is more and more demand for the teas of traditional Chinese medicine (TCM).

In this established handbook, pharmacists and physicians will find more than 500 time-tested tea mixtures from Western phytotherapy and now more than 60 TCM tea recipes from the Far East, clearly arranged by application.

Each tea recipe includes all of the necessary patient instructions for its preparation, dosage, and type and duration of application. Ready-to-copy masters can be used as-is to label tea bags and hand out to patients.

Solid, clearly arranged and easy to use – *Herbal Tea Recipes* has long had an established place in the pharmacy. Doctors' practices, too, will find the handbook a useful aid.

Readership: Physicians, pharmacists, pharmaceutical technicians

Seeger / Neumann

Lexicon of Poisons and Toxins

A handbook for physicians, pharmacists and natural scientists

Founded by Prof. Dr. Ruth Seeger

and Prof. Dr. Hans-Günther Neumann.

Revised by Prof. Dr. Dr. Dieter Schrenk.

In collaboration with Alexander T. Cartus, Stefanie Knerr and Hans-Joachim Schmitz.

Complete work incl. 6th supplement 2015.

Approx. 690 pages. 1 ring binder. Loose-leaf serial.

€ 44,- [D]

ISBN 978-3-7692-6133-2

Focus on poisons and toxins

In the *Lexicon of Poisons and Toxins*, readers will find a broad spectrum of poisonous and toxic substances from the realms of natural substances, synthetic compounds and contaminants.

The authors places particular emphasis on molecular mechanisms of action and on the effects of chronic exposure.

The 6th supplement now includes:

- the mycotoxins aflatoxin and fusarium toxins
- asarone / oil of calamus misused as a psychotropic additive to spirits
- thiomersal, a preservative found in cosmetics, pharmaceuticals and vaccines

For years, the *Lexicon of Poisons and Toxins* has been a reliable reference work, providing pharmacists, physicians, pharmacologists and toxicologists data they can trust on the most important poisons and toxins.

Readership: Pharmacists, physicians, pharmacologists, toxicologists, natural scientists

Fahr

Voigt Pharmaceutical Technology

For classroom and workplace

By Prof. Dr. Alfred Fahr.

12th completely revised edition 2015.

XXIV, 688 pages. 335 colour figures.

113 colour tables. Format 19,3 x 27 cm

Hardcover. € 87,- [D]

Prepublication price valid until 31.05.2015: € 69,80 [D]

ISBN 978-3-7692-6194-3

How does medication reach its target in the body?

Tablets, capsules and suppositories – ointments, creams and gels – solutions, emulsions and suspensions – extracts, tinctures and distillates – inhalants and aerosols – the variety of solid, semisolid, liquid and gaseous medications is enormous, and ingenious new solutions for the optimisation of drug delivery are developed every day.

For almost 50 years, "Voigt" has set standards in pharmaceutical technology, both in the classroom and at the workplace. Take advantage of the authors' compiled expertise on both fundamentals and the latest developments in the field.

From the contents:

Fundamentals of dosage forms | sterilisation | stability and stabilisation | bases and excipients | incompatibilities | packaging technology | biopharmacy | monographs about administration forms

Readership: Pharmacy students

Holm / Herbst

Botany and Pharmacognosy

Revised by Barbara Eigner.

10th revised and enlarged edition 2015.

Approx. XIV, 260 pages. 56 colour figures.

Numerous formulars. 7 tables.

Softcover. Approx. € 26,80 [D]

ISBN 978-3-7692-6247-6

Two subjects – one book

With the multitude of herbal drugs and phytopharmaceuticals available today, you need a solid grasp of the subject to be able to provide competent advice.

This trusted textbook conveys the relevant facts in a concise, easily understandable form. Botany provides the biological foundation, while pharmacognosy makes the transition to practical implementation. Drug profiles give you a quick overview. All of the drug information conforms with the current pharmacopoeias.

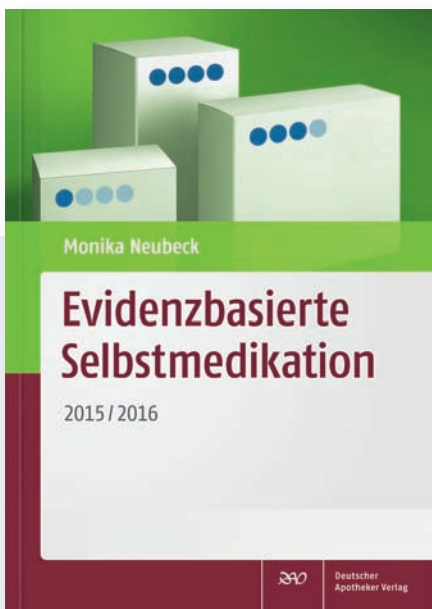

The author places particular emphasis on actual practice and provides numerous tips that can be put right to work when counselling customers in the pharmacy. A chapter on phytotherapy for children and pregnant women gives you confidence when assisting these especially sensitive patient groups.

The latest edition now includes a chapter on drugs with fats and fatty oils as well as an introduction to the taxonomy of the spermatophytes.

The winning team for classroom and workplace!

Readership: Pharmaceutical technicians in training and on the job

Pachaly / Koch

TLC Atlas

Thin-Layer Chromatography in the Pharmacy

Founded by Prof. Dr. Peter Pachaly.

Revised by Dr. Angelika Koch.

Complete work incl. 8th supplement 2015. 912 pages.

304 monographs. Numerous four-colour figures.

Format 21 x 29,7 cm. 2 ring binders.

Loose-leaf serial. € 108,-

ISBN 978-3-8047-3288-9

TLC identification in the pharmacy laboratory

Thin-layer chromatography plays an important role in the chemical analysis and identification of medicinal agents, drugs and compounds in the pharmacy laboratory. This four-colour atlas contains simple, ready-to-copy testing guidelines for substances and compounds commonly tested in the pharmacy. It shows each chromatogram in true colour for confidence in identification.

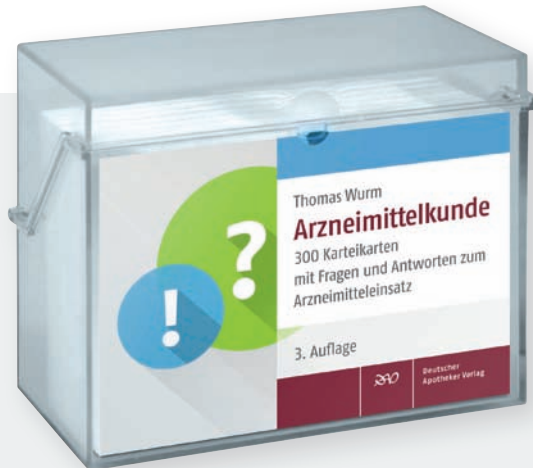

In addition to updated monographs the eighth revision contains 17 new monographs, including

- phytopharmaceuticals such as verbena and vitex berries,
- preservatives such as benzoic acid, chlorhexidine gluconate, sorbic acid and potassium sorbate,
- cholic acid derivatives used as carriers or absorption enhancers in oral forms and topical preparations.

In all, the work now contains more than 300 monographs.

Readership: Pharmacists in private and hospital dispensaries, analytical laboratories, pharmaceutical manufacturers and quality assurance laboratories, educational institutions (pharmaceutical institutes)

Your mighty helper in a small package

What's a pharmaceutical technician or pharmacist to do when they are working on a formulation and need data on the active ingredients? Turn to aporello: one look, and

- the proper dosage
- all of the relevant facts about substance stability
- known incompatibilities and
- an overview of compatible carriers

are all at your fingertips for 56 substances commonly used in formulation.

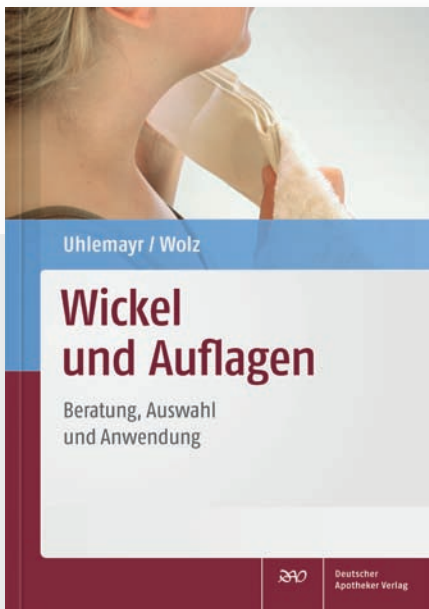

New in the 2nd edition:

- extensive additions to the lists of compatibilities
- common dosages in paediatric dermatology
- compatible preservatives.

Concentrated knowledge at your fingertips has a name – aporello!

Galuschka

Biochemistry for the Clueless

An introductory aid for students

By Dr. Antje Galuschka.

2nd edition 2015. Approx. XII, 274 pages.
269 colour figures. 12 colour tables. Softcover.
Approx. € 29,80 [D]
ISBN 978-3-7776-2415-0

Citric acid cycle? Beta sheet? Phospholipids? How am I ever going to understand?

We can no longer imagine the natural sciences without biochemistry. Whether in medicine, biology, food technology or biotechnology – a knowledge of biochemical fundamentals is required in all fields of natural science, and new methods and findings are constantly expanding the borders of our knowledge.

This short textbook summarizes the current state of knowledge in the most important areas:

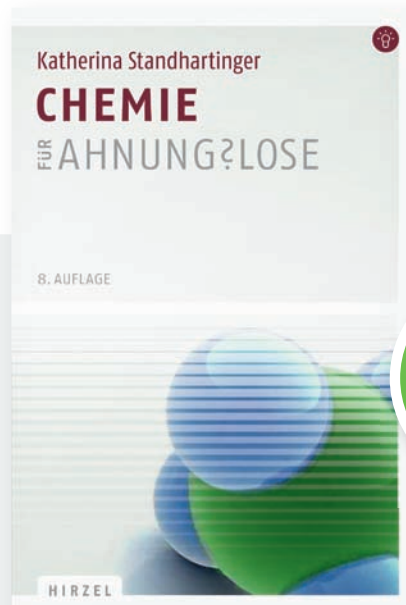

- physical and chemical fundamentals
- nucleotides, enzymes and hormones
- carbohydrates, lipids and proteins
- metabolism and the immune system
- molecular genetics
- laboratory methods (DNA sequencing, microarrays, gene tests ...)

In addition to clearly presented structural formulas and reaction equations, explanatory sketches help understand complicated material.

This book is not just a compact collection of facts, but explains the interconnections in an easy-to-understand fashion and tells the reader why things happen so that he or she can learn to juggle the molecules of life!

Readership: Students of medicine, natural sciences and biology

Standhartinger

Chemistry for the Clueless

An introductory aid for students

By Katherina Standhartinger.

8th edition 2015. X, 116 pages. 17 colour figures.
30 colour tables. Softcover.
€ 24,80 [D]
ISBN 978-3-7776-2414-3

I never did get the hang of chemistry!

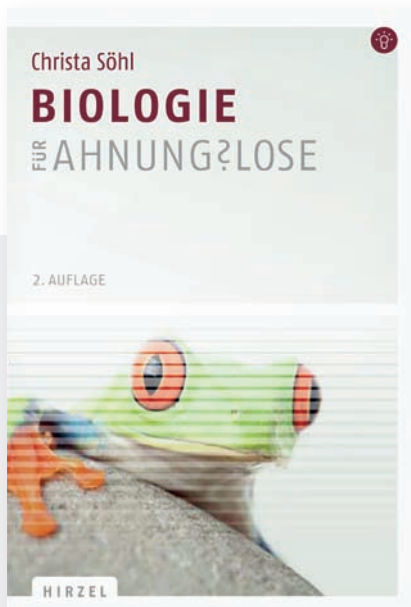

How often have we heard that complaint? The world seems divided into two groups: those who understand chemistry and everyone else. This book was written so that everyone can belong to that first group.

Now in its eighth edition, Katherina Standhartinger's bestseller is able to teach the reader the most important concepts of chemistry in an interesting and entertaining fashion. Unnecessary details are left out so the reader can concentrate on the essentials. Take a look and find out that you, too, can understand chemistry!

From the contents: Aggregate conditions – substances – mixtures – pure substances – elements – atomic structure and the periodic system – atomic shell model – atomic orbital model – atomic mass – mol – Avogadro constant – amount of substance – stoichiometry – covalence – inert gas electron configuration – octet rule – metals – halogens – salts – acids and bases – interactions – van der Waals force – electronegativity – types of chemical bonds – reactions – chemical equations – energy

Readership: Students of medicine, natural sciences and biology, high school students

Söhl

Biology for the Clueless

An introductory aid for students

By Dr. Christa Söhl.

2nd revised edition 2015. XII, 332 pages.

141 colour figures. 16 colour tables.

Softcover. € 29,80 [D]

ISBN 978-3-7776-2392-4

Mitochondria, Mendel's laws, Muscle contractions – Didn't I read about that somewhere!?

As the study of life itself, biology is the branch of science that touches us most directly. But biology in the school classroom and at university rapidly progresses beyond just the birds and the bees. The technical terms multiply, and the subject starts to become difficult.

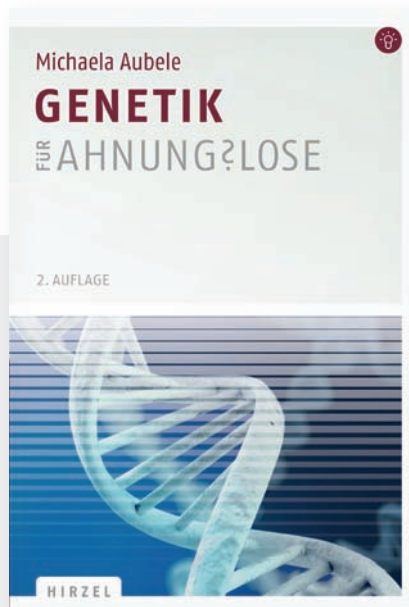

Biology for the Clueless was designed to be an expert companion for high school students and beginning university students with a minor in biology. Students in bachelor's and master's programmes in biology will also find it useful for reviewing and polishing up old material. More than 200 exercises with solutions help to consolidate the knowledge.

From the contents: cell biology | metabolism | nervous and sensory physiology | muscles and locomotion | the hormone system | reproduction and ontogenesis | genetics | immune defenses | behavior | ecology | evolution

Learn how we tick!

Readership: Students of medicine, natural sciences and biology, high school students

Aubele

Genetics for the Clueless

An introductory aid for students

By Prof. Dr. Michaela Aubele.

2nd revised and enlarged edition 2015.

X, 187 pages. 52 colour figures.

33 colour tables. Softcover. € 24,80 [D]

ISBN 978-3-7776-2393-1

Understanding the world of DNA

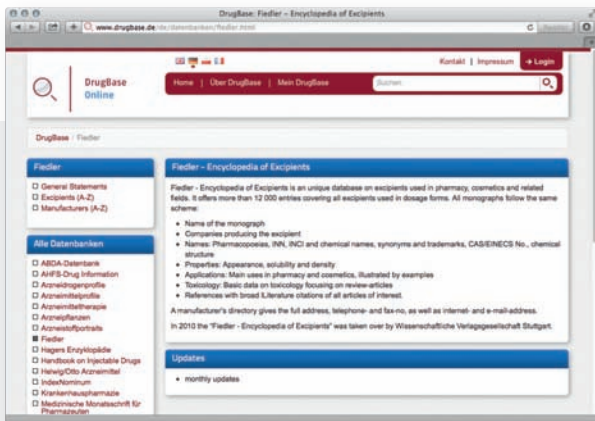

Over the last few years, genetics has taken centre stage in public attention, but also plays a major role in specialties such as biochemistry, pharmacy, agricultural science and medicine, where a basic knowledge of genetics is now a prerequisite. Often, the pace of classroom instruction has become too rapid even for biology students.

This book gives you a compact introduction to the basics in genetics. It can be used as an introduction, a study aid, or a quick review. A previous knowledge of genetics is useful, but not absolutely necessary – with this book, even the "clueless" can get a grip on genetics.

From the contents: the cell | genetic material | genome structures | replication | cell cycles and cell division | recombination | transcription – RNA processing – translation | regulation | signal transduction | mutation | DNA repair mechanisms | formal genetics | Mendelian inheritance

Readership: Students of medicine, natural sciences and biology

Fiedler – Encyclopedia of Excipients

at www.DrugBase.de

Revised by Dr. Martin Holzer.

Yearly licence fee for one concurrent user from one location:

For individuals or community/retail pharmacies:

€ 193,- plus VAT

For hospitals or hospital pharmacies: € 386,- plus VAT

For companies or institutions: € 772,- plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.
Free 10-days-trial at www.DrugBase.de.

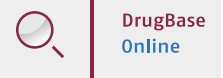

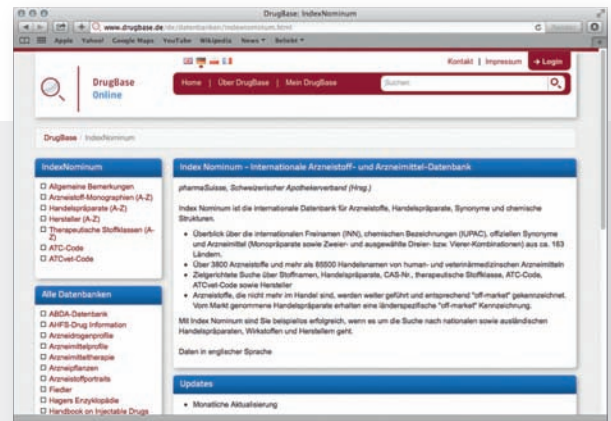

Fiedler – Encyclopedia of Excipients is the most comprehensive database on excipients used in pharmacy, cosmetics and related fields offering **more than 12 000 entries**. Monographs follow a unified structure:

- Names and synonyms: INN, INCI, compendial, trivial and chemical names, trademarks, CAS-, EINECS- and E-numbers
- Definition: Description, composition, chemical structure, molar mass
- Basic properties: Appearance, physicochemical data, solubility, spectra, etc.
- Application characteristics and main uses in pharmacy and cosmetics, illustrated by examples
- Stability and incompatibilities
- Pharmacology and toxicology
- Analysis methods
- References with broad literature citations
- List of excipient suppliers

A manufacturers directory gives **about 500 addresses** and full contact details.

Readership: Pharmaceutical and cosmetic industries, research organisations, laboratories, suppliers, authorities, colleges/universities, pharmacies

Index Nominum – International Drug Directory

at www.DrugBase.de

Edited by pharmaSuisse, Swiss Association of Pharmacists.

Yearly licence fee for one concurrent user from one location:

For individuals or community/retail pharmacies:

€ 298,- plus VAT

For hospitals or hospital pharmacies: € 596,- plus VAT

For companies or institutions: € 1192,- plus VAT*

* Other prices apply to additional locations or additional concurrent users. Quotation on demand.
Free 10-days-trial at www.DrugBase.de.

Index Nominum is the international database for active pharmaceutical ingredients (APIs), branded medicinal products, synonyms, and chemical structures.

- Overview of the international nonproprietary names (INN), chemical designations (IUPAC), official synonyms, and medicinal products (medications containing a single active substance as well as dual combinations and selected combination drugs containing three or four active agents) made by **16 500 manufacturers** in 175 countries.
- **7000 active substances** and derivatives, **24 100 synonyms**, and **more than 233 000 trademarks** of medicinal products for human and veterinary use
- Targeted search by API name, branded medicinal product, CAS No., therapeutic class, ATC code, ATCvet code, and manufacturer
- APIs that are no longer commercially available are retained and correspondingly labelled "off-market". Branded medicinal products withdrawn from the market are given a country-specific "off-market" label.
